

The truck we have for hire is a bit of a niche machine as there are not many around for hire if any at all, the truck is a 2004 Iveco ACCO 2350G with a donkey forklift on the back. This truck is perfect for companies that are moving warehouse or for people that need to deliver pallets and don't want to or have no time to wait to be unloaded as one person can do the loading, driving and unloading as the truck has all the equipment necessary to complete the job.

The truck comes with air-condition and automatic transmission. You will need to have a HR truck licence and an LF forklift licence to be able to hire this truck.

The truck can carry 22.5 tonnes without the forklift attached or 20 tonnes with the forklift attached.
