

Mobile Camps

an end-to-end remote camp solution

TOLL

The Toll Group

The Toll Group is an Australian owned and publicly listed company with annual revenues in excess of AUD \$8 billion. The Group employs 40,000 people across a global network of over 1,200 sites in more than 50 countries. Our long history is characterized by dynamic growth, successful integration and a strong diversity of operations.

Toll's corporate diversity is a strong enabler for worldwide access to transport and infrastructure assets including: road transport fleets, rail rolling stock, aircraft and ships, warehousing, ports and railways; all operated to achieve international best practice in logistics delivery.

Benefits of working with Toll

- Strong financial position and capacity to deploy assets rapidly
- Australian company that incorporates high local content in all its camp infrastructure
- Unblemished compliance record and observance of the regulatory environment
- Demonstrated past performance with a resources and government customer base that includes: Arrow Energy, Savanna Energy, Drillstralis, BHP Billiton, the Australian and United States Government and the United Nations.
- Tried & tested processes and procedures are in place to ensure the safety of all stakeholders and to ensure maximum efficiencies
- Highly developed regional network of suppliers and vendors.

Our commitment to you

Toll will provide your organisation with a value for money and low risk solution that embodies the Toll Group Code of Practice, "The Toll Way", a strong set of values and principles.

Our core values are:

- Integrity and trust
- Safety
- Continuous improvement
- Teamwork
- Being open and transparent.

By selecting Toll as your logistics provider, you can have peace of mind knowing that the support you receive is from the industry's best.

The mobile camp solution

Toll's fully self-sufficient mobile camp solution have been designed from the ground up to ensure maximum efficiency and safety.

The camp utilises an integrated trailer solution incorporating plug and play capabilities allowing for rapid deployment and relocation to almost any location.

Toll is able to provide a complete camp solution; from providing the camp infrastructure and mobilising rapidly to management of the day to day camp operations & supply chain.

Each camp is Australian made using locally sourced equipment & materials and all staff are fully trained to run and operate a 24/7 camp.

Our solution is more than a donga on wheels - it is a complete service offering. Utilising our extensive logistics network in Australia coupled with our history of providing camp support services, Toll provides a reliable mobile camp solution giving every resident a home away from home experience.

Quick camp overview

Image: 24 person camp based around Longreach (Central West Queensland) for a drill exploration project.

Safety

- No high-risk equipment required (eg. cranes & frannas)
- Overhead lifts and working from heights have been eliminated from the design
- The camps only use diesel fuel
- Smoke detectors and fire extinguishers in every unit
- Full camp emergency evacuation alarm
- First aid and defibrillator are on site at all times.

Environmental

- Sewerage Treatment Plant produce Class A water
- No civil works are required
- Each trailer has self-levelling mechanisms eliminating the need for earthworks
- Self-bunded fuel tanks with high & low level alarms
- Insulated generator room to reduce noise
- Spill kits are on site at all times.

Food Safety

Toll is committed to the production and supply of quality safe food products. Toll's Food Safety Program is accredited to:

- HACCP
- ISO 22000
- Australian Food Safety Standards Code
- Food Hygiene Regulations
- Good Hygiene Practice.

Benefits to your operation

Improved Safety

Our camps have been purpose-built to ensure maximum safety of camp residents and staff. Common safety concerns have been eliminated from the design.

High Local Content

Every Toll Mobile Camp has been designed and built in Queensland from locally sourced equipment and material.

Reduced Environmental Footprint

Utilising a trailer base solution with stabilisers eliminates the need for earth works, site levelling or in-ground piping.

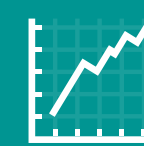

No Capital Expenditure

Toll enables organisations to hire our rapid deployable camp solution without the capital expense.

Improved Project Timeframes

Understanding the need to improve project timeframes; Toll has designed the camp so it can be mobilised and demobilised quicker than a standard mobile camp.

Reduced Operational Costs

Relocation, mobilisation, demobilisation and running costs are significantly reduced compared to standard mobile camps.

Full Camp Management

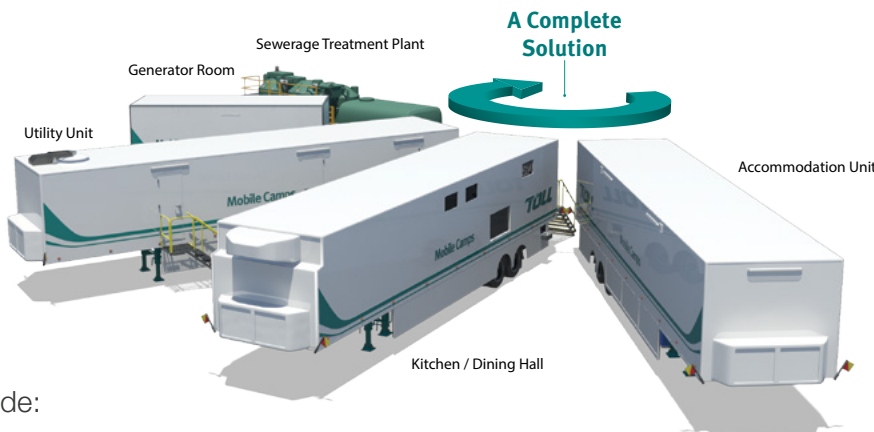

Managing a remote camp can be difficult; from the logistics involved in mobilising a camp to the resupplying of food, water and fuel in regional locations to managing and training the staff involved in maintaining the camp.

As an experienced camp operator in remote and regional locations, Toll understands how to enable cost efficiencies and reduce risks.

Toll is able to provide a complete mobile camp service offering by integrating our established logistics network and camp experience with industries best camp trailers to enable your organisation to focus on its core operations.

Our camp staff are extensively trained to provide support to camp residents and to maintain the camp infrastructure.

The services we provide include:
