
WALK BEHIND WET SCRUBBING

Designed for the smaller hard to get to areas our walk behind wet vacuum scrubbers are suited for cleaning smaller rooms with a standard doorway entry and any tiled or delicate floor surface. Our equipment can also access mezzanine levels via site lifts.

LINEMARKING INSTALLATION AND REMOVAL

Melbourne Power Sweeping install and remove any linemarking application required. Installation and removal from both bitumen and concrete surfaces includes carparking bays, numbering, letters, hazard / safety zones and pedestrian walkways.

GRAFFITI REMOVAL

We provide graffiti removal services for property owners, schools, hospitals, Body Corporates, Real Estate Agencies & Property Management Companies. Graffiti removal includes a chemical application, high pressure cleaning and in some cases repainting the affected surface.

HIGH PRESSURE 'HOT' ROTAR WASHING

Rotar washing with high pressure **HOT** water delivers the most even surface clean. Rotar washing is suitable for tennis courts, carparks and external paved areas.

HIGH PRESSURE HOT WASHING

Our truck and trailer mounted mobile units deliver high pressure **HOT** water at 3000psi, ideal for cleaning floors, walls, plant and equipment. We complete the job, pack up **REMOVE** and drive away leaving you with a clean surface.

ABOUT US

The cornerstone to **Melbourne**

Power Sweeping is the commitment to a high level of service commitment, efficiency and dependability in our professional commercial, industrial cleaning sweeping & scrubbing services. These three (3) core values shape the business in such a way, that few of our competitors can match up.

ROAD SWEEPING

Melbourne Power Sweeping's fleet of the latest model road sweepers are servicing all areas and industries including commercial, industrial and building/construction sites, shopping centers, car parks, manufacturing plants and road networks.

RIDE ON VACUUM SWEEPING

Our ride on vacuum Sweeping units are fitted with a specialized vacuum system that filters the air and ensures a dust free environment which is perfect for warehouse/logistics facilities. All units are fitted with safety devices including rotating beacon, reverse beeper and fire extinguisher.

RIDE ON SCRUBBING (WET)

Via mechanical wet scrubbing and degreasing, Melbourne Power Sweeping specialize in the removal of impregnated grease, dirt and oil stains from any floor surface area. Our equipment is transported to and from the site by the equipment operator.

STORM WATER PIT CLEANING

Pit cleaning devices have been fitted to our fleet of road sweepers and have the capability in correcting large and small spills that include water, oil, dirt, sand and debris. Waste is then disposed of at a licensed landfill facility.
